

The Company

Alusic builds and distributes aluminium structural profile systems and related accessories, versatile systems for automation, and spare parts for lightweight framing. Structures are designed using three-dimensional design systems; testing is carried out in-house with the help of rapid prototyping techniques; and all the accessories in the Alusic catalogue are compatible with the majority of aluminium profiles on the market.

✓ Problem...

Alusic needed to efficiently store scrap aluminium bars.

✓ Solution!

To achieve this goal, Alusic installed the Modula storage solution: storage of aluminium bars together with optimal scrap storage. The company has noticed significant space savings thanks to the use of the available height.

MODULA FEATURES

Trays: 162

Model: ML50D - external bay

Capacity: 500 Kg/tray

Height: 8900 mm

No: 3 machines

Application: storage of aluminium bars and miscellaneous metallic materials

Software: Standard WMS

Optionals: none

Interfaced management system: OS1
